

LIVE WEBINAR

LIGHT ON A DARK SUBJECT: PRACTICAL ALS INJURY PHOTOGRAPHY

June 6, 2025 | 1100 - 1230 EST

COURSE DESCRIPTION

This introductory course is designed for Crime Scene Investigators who are looking to take injury photography to the next level by incorporating an ALS (Alternate Light Source).

Many CSI professionals hesitate to engage in ALS photography due to discomfort, lack of equipment, or uncertainty about the legal process. This webinar will break down those barriers and give you the tools, mindset, and confidence to make ALS injury photography a standard, compassionate, and effective part of your work.

What you'll learn:

- Budget-Friendly Techniques: *Learn how to take clear, compelling ALS images without high-end tools or studio setups.*
- Handling Sensitivity with Skill: *Understand the emotional and ethical challenges of photographing domestic violence victims—and how to navigate them with empathy, professionalism, and care.*
- Legal Admissibility Made Simple: *Get clarity on how to ensure your images hold up in court, so your hard work makes an impact.*

WHY CHOOSE US?

Our specialized training and resources bridge the gap between generic leadership courses and traditional forensic technician training, equipping you with the skills and knowledge needed for professional development in your forensic career.
