

LIVE WEBINAR

SCIENCE, STANDARDS, AND SPEAKING:

THE CORE OF FRICTION RIDGE EXAMINATION

April 17, 2026 | 1300-1500 EST

COURSE DESCRIPTION

This training provides a comprehensive overview of the key principles and practices that drive success in the friction ridge examination process within the Latent Print discipline. Participants will strengthen their understanding of the scientific foundations of friction ridge analysis, the application of current standards and best practices, and the critical thinking skills required to conduct accurate, defensible examinations.

Emphasis is placed on applying methodology with consistency, documenting findings clearly, and effectively communicating conclusions to support investigations and courtroom testimony. This course is ideal for students exploring the Latent Print field, trainees developing foundational skills, and practicing examiners seeking a practical refresher to reinforce competence and confidence in their casework.

WHY CHOOSE US?

Our specialized training and resources bridge the gap between generic leadership courses and traditional forensic technician training, equipping you with the skills and knowledge needed for professional development in your forensic career.
