

LIVE WEBINAR

HOW IT'S DONE: SURVIVING, THRIVING, & LONGEVITY IN THE FORENSIC DISCIPLINE

August 4, 2026 | 1200-1300 EST

COURSE DESCRIPTION

Forensic professionals face unique challenges—repeated exposure to trauma, high-stakes decision-making, demanding caseloads, and the pressure to perform at their best. Over time, these demands can impact our well-being, effectiveness, and passion for the work.

In this engaging session, we'll explore practical strategies for building resilience, preventing burnout, and sustaining a long, rewarding career in forensic science. Along the way, we'll draw unexpected lessons from the hit animated film KPop Demon Hunters, discovering how themes of perseverance, teamwork, and confronting darkness mirror many of the challenges forensic professionals face every day.

No prior knowledge of the film required—just a willingness to think differently about what it takes to thrive in this profession.

WHY CHOOSE US?

Our specialized training and resources bridge the gap between generic leadership courses and traditional forensic technician training, equipping you with the skills and knowledge needed for professional development in your forensic career.
