

LIVE WEBINAR

PROTECT, PRESERVE, PROCESS: CRIME SCENE POLICIES AND PROCEDURES

December 17, 2026

3:30 pm–4:30 pm
EST

COURSE DESCRIPTION

"Effective crime scene policies and procedures should do more than satisfy a requirement; they should provide clear expectations, support consistent practices, and evolve alongside the work. This presentation provides a practical framework for developing, organizing, and maintaining policies and procedures for crime scene operations.

Designed for current and aspiring forensic supervisors, the session explores how to identify what needs to be addressed, locate and apply professional resources and standards, and determine the best way to organize information. Attendees will also explore strategies for document control, accessibility, and ongoing review.

Whether starting from scratch or improving an established program, attendees will leave with a straightforward approach to creating policies and procedures that are clear, practical, accessible, and sustainable."

WHY CHOOSE US?

Our specialized training and resources bridge the gap between generic leadership courses and traditional forensic technician training, equipping you with the skills and knowledge needed for professional development in your forensic career.
